Call for sizes outside these limitations.

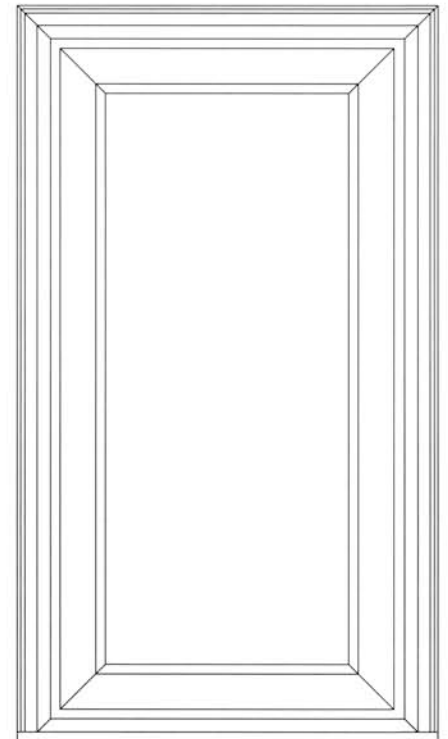

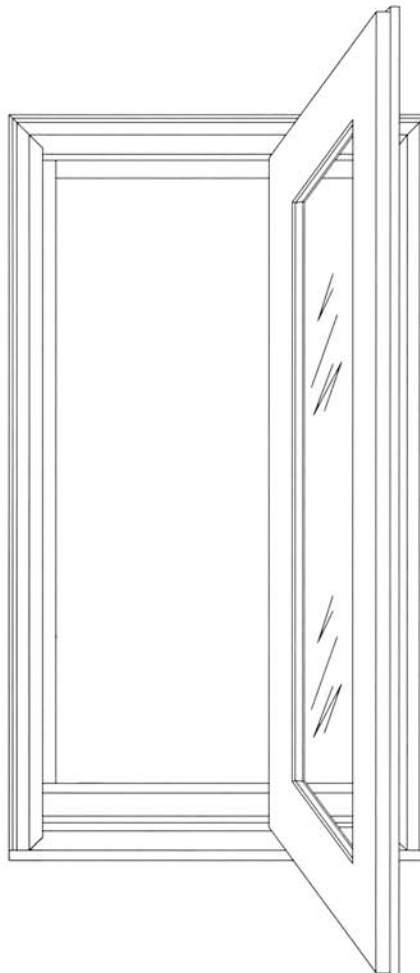

## EURO STYLE TILT-TURN

Choose between having your window wide open or simply create a small draft. Parrett's high performance Tilt-Turn provides European styling, high quality craftsmanship, and exceptional value. You'll be amazed by the engineering and great functionality of this beautiful window. If you are looking for a distinctive window that performs at the highest level, this is a window you will want to consider. View the best at Parrett.

Simply turn the handle 45 degrees to the left and pull back. The window will tilt down and open similar to a hopper window. This is a great way to increase ventilation in a room.

Turn the handle another 45 degrees and the unit will operate as an in-swing casement.

When locked in the closed position the Tilt-Turn unit adds safety and security with the high performance multi-locking system.
